Act 1: The Garbage Freighter

Route, points and screens on the original layout. Playable from the first screen to the escape.

Escape pod (the script's opening)

Open the locker, take the pod manual (it says: engines first, radar before takeoff, front shields before firing). Open the hatch.

Crash site and the tube (5 points)

East to the tube entrance, through the middle arch into the tube. Pick up the hanging wires.

+5 Get the wire from the space tanker

Robot head (5 points)

East to the robot head. Use the broken eye to climb up to the shuttle. Look at it, note the open panel, climb down the ladder. Do not step into the chasm.

+5 Climbing through the metal robot's broken eye

Junk field and lift tower (5 points)

Back to the crash site, south, east. Use the lift tower: the bucket carries you up to the conveyor.

+5 Getting into vertical trash bucket

Conveyor (timed) (10 points)

The belt carries you to the shredder. Use the rail overhead to jump before it arrives.

+10 Jumping up to the rail

Rail and the grabber (35 points)

Walk west along the rail to the tower; Use the grabber. In the claw view click along the yard: Push the warp motivator (white drum) to lift it, move over the shuttle's open panel and Push again. Walk off at the platform, then Use the blue chute.

+15 Getting the motivator with the grabber
+15 Installing the motivator in the ship
+5 Falling through the garbage chute

Dark room (rats on a timer) (25 points)

Pick up the reactor from the hole. Climb the ladder to the tube entrance. In the tube the rat steals the reactor and the wire: go back down for both, then pick up the ladder at the tube entrance.

+15 Getting the reactor from the rat's lair
+10 Getting the ladder from the rat's lair

Shuttle yard (25 points)

Climb the robot's eye again. Use the ladder with the shuttle, open the top hatch, use the reactor and the wire on the power panel, then go through the hatch.

+5 Using the ladder to get to the top of the spaceship
+10 Opening hatch and entering the spaceship
+5 Installing the reactor
+5 Installing the wire

Cockpit (35 points)

Use the seat for the buckazoids. Use the computer: Engines, Radar, Takeoff; then Weapons and Front shields, Fire.

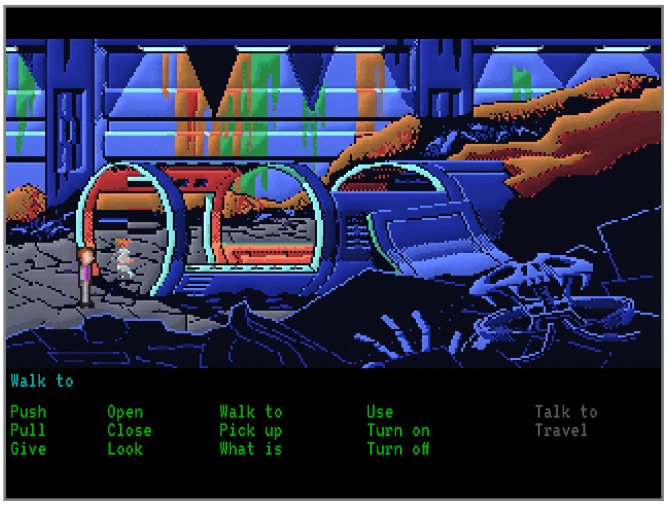

+10 Finding buckazoids by searching the pilot's cushion
+25 Safely escaping the trash freighter

Act 1 total: 145 points (of 738)

Deaths in this act, each with its own painted picture: the chasm, the metal plate, the shredder (too slow), stepping off the rail, the rat (too slow), taking off without radar, switching the engines off in flight, and firing without front shields. The game checks the whole route from the first screen to the escape: all 15 events, exactly 145 points.
